Education

Enspiral Dev Academy
Web Development
Wellington campus
11 Jan 2016 - 13 May 2016

Enspiral Dev Academy is a boot-camp-style course on steroids. Over the course of 2 months we produce real-life projects in an agile enviroment, logging over 1000 hours. Enspiral places a great emphasis on working in a team, and constantly switching roles.

Design and Arts College
Christchurch Campus
Diploma Of Communications & Design
July 2011 - 2012

D&A was a one year that course that taught graphic design very practically, Using adobe creative suite. I gained a wealth of design knowledge here, as well as basic HTML & CSS.

Yoobee School of Design
July 2014 - December 2015
Wellington campus
Diploma of Web Development

Yoobee was a one year course that taught advanced HTML, CSS and Javascript. Also stepped into PHP and Laravel, as well as expanding on design principles. Yoobee was my introduction to stepping away from being just a designer to a developer.

Burnside High School
NCEA Level 3 Merit
July 2006 - 2011
university entrance achieved

During high school I started my journey to becoming a designer. I focused on Graphic Design and photography, and in my final year was a Prefect and international student liason.

Employment

Enspiral Consulting
Web developer

Immediatly after graduation the consulting pod within the enspiral space offered me a fixed-contract to bring a clients site to deploy-ment. This involved working in the Silverstripe framework, sprint-meet-ings with clients, and working full-time as part of a 5-person

Cosmic Corner
2ic Salesperson
September 2013 - May 2014
Second-in-command of Manners St and Upper Cuba St
Responsible for sales, displays, cash-handling. My main purpose in this role was to interact with custom-ers and represent Cosmic Corner's culture daily.

Amsterdam Coffeeshop
Barista
June 2013 - September 2013

Duties included customer service, coffee-making, food-handling, open-ing & closing solely. I worked closely with coffee providers to ensure we had fresh, daily ground coffee.

Highnet Internet Cafe
Floor manager
Worked solely helping customers with any issues, monitoring customers computer use, maintaining computer integrity. This role taught me the essential skills in working face-to-face with the public.

Freelance

Spacesuit Clothing
Web developer/graphic designer
I saw the production of this clients website from concept to deployment, starting in Adobe illustrator and moving into PHP to produce a online shop.

Paul Steele Events
Graphic designer
Created promotional material for various events. Mostly flyers, stickers and managing social media

Mark De'velo
graphic designer
Created logo, business card & invoice for architect Mark De'velo.

Filigree Jewels
Database normalisation of customers details using MySQL. Spent time with the webmaster to optimise the database for future entries.

Michael Tuffery
Graphic Designer
Created promotional material for artist Michel Tuffery's upcoming exhibition "Lakapi". I often work with Michael to quickly create one-off documents.

Skills & Technologies

Iam extremely comfortable working with HTML & CSS, and can quickly scaffold designs I've produced or been given in Illustrator or Photoshop to working online templates.

I love to play with front-end technologies, and push the boundaries of user interaction. I like users to be suprised, and intrigued at what we as web-developers can produce.

Although it can be a challenge, I've enjoyed stepping further into the backend, Using modern technologies together to produce functional, scalable products. Im comfortable working with express to create a server, and love to write my own restful API's.

I'm a great practitioner of AGILE methodologies, and bring these practises into my own life to maintain organisation. No matter the size of the project, im a firm believer in Kanban boards and regular stand-ups. My ability to adapt to situations on a day-by-day basis, and prioritise has always been well-loved by groups im a part of.

Recently I have been experimenting with React.js and Redux, and am loving the flexibility and efficiency it allows on the front-end by rendering only the relevant information.

Interests

Photography has been my main hobby outside of coding since High school. I try to keep my camera with me most days, and have recently made it a goal to dive deeper into film photography, and how to develop it myself.

I've recently purchased a raspberry pi, which has been my latest obsession. Since graduation at EDA and having more spare time, i've been able to attend as many meet-ups related to what I love as possible.
